

Siddhesh Vaishnav

Aspiring AI/ML Engineer and Software Developer

+91 7774842406 sidvaishnav001@gmail.com [Github](#) | [LinkedIn](#) Mumbai, India

SUMMARY

I am an aspiring AI/ML Engineer and Software Developer with foundational experience in building full-stack applications and leveraging machine learning models. I have hands-on experience in Python, PyTorch, and data analysis, demonstrated through various projects in image processing, traffic optimization, and inventory management. I am eager to apply my skills in a challenging internship or entry-level role.

EXPERIENCE

Artificial Intelligence Intern

07/2025 - 09/2025

[SmartED Innovations](#)

Internship focused on artificial intelligence and machine learning

- Completed comprehensive training in AI/ML fundamentals and key Python data science libraries (NumPy, Pandas, Matplotlib).
- Performed Exploratory Data Analysis (EDA) on a 1000+ row dataset, applying data cleaning and visualization techniques.
- Gained hands-on experience by building several Python-based projects throughout the internship program.

EDUCATION

BE(Computer Engineering)

Mumbai, MH

08/2023 - 05/2027

CERTIFICATIONS

[Infosys Springboard](#)

Java Essentials, 2024

[Klic MKCL](#)

C, August 2022

[Oracle Certified Professional](#)

OCI 2025 Data Science

[Infosys Springboard](#)

Python Programming, 2025

[Klic MKCL](#)

C++, September 2022

[Oracle Certified Professional](#)

OCI 2025 AI Foundations

SKILLS

C/C++, CSS, Data Structures, Django, EDA, Flask, Git, GitHub, HTML, Java, JavaScript, Matplotlib, Next.js, Numpy, OpenCV, Pandas, Python, PyTorch, REST, Seaborn, SQL

PROJECTS

AI Image Enhancer Web App

A web application designed to improve video and image quality using advanced AI models.

- Developed a full-stack application using Python, FastAPI, and Next.js to enhance media quality with AI.
- Integrated Real-ESRGAN and GFPGAN models via PyTorch to upscale image resolution by up to 2x and restore facial details.
- Utilized OpenCV for backend video and image processing pipelines.

Traffic Optimisation System

A system aimed at optimizing traffic signals based on analysis of video footage.

- Engineered a proof-of-concept system with Python, Flask, and OpenCV to analyze video footage and optimize traffic signals.
- Designed and integrated a MySQL database to store and process traffic flow data for analytical reporting.

Inventory Management System

A comprehensive inventory management system for better stock control and efficiency.

- Built a web-based inventory system using Django and MySQL to centralize stock monitoring for multiple user roles.
- Implemented modules for product cataloging, stock tracking, and order management to improve accuracy and reduce manual errors.

FreelanceHub CRM

Developed an AI-powered CRM platform for freelancers using Next.js 14, TypeScript, Supabase, and OpenAI API for intelligent client management, project tracking, and automated invoice generation.

- Integrated Stripe payments, Prisma ORM for database operations, and built responsive UI with Tailwind CSS and shadcn/ui components.
- Implemented secure authentication, real-time updates, background job processing with BullMQ/Redis, and automated email notifications.
